Mendeley nedir?

Mendeley makalelerinizin yönetmek, paylaşmak, okumak, notlar almak ve alıntı yapmak için kullanabileceğiniz ücretsiz yazılımdır.

Aynı zamanda makalelerinizi çevrimiçi yönetebileceğiniz, yeni trendleri ve istatistikleri keşfedebileceğiniz ve benzer konularda çalışan araştırmacılarla iletişim kurabileceğiniz bir araştırma ağıdır.

The screenshot shows the Mendeley Desktop application window. The main area displays a list of documents with columns for Authors, Title, Year, Published In, and Added. A search bar is visible at the top right. The left sidebar shows 'My Library' and 'Shared Collections'. The right sidebar shows 'Tags & Notes', 'Document Details', and 'References' for the selected document.

Koleksiyonuzu kurun ve yönetin

Document Details for the selected document:

- Type: Journal Article
- Title: Adoption of e-business functions and migration from EDI-based to XML-based e-business frameworks in supply chain integration
- Authors: Nurmilaakso, J
- Journal: International Journal of Production Economics
- Volume: 113
- Issue: 2
- Pages: 21-733
- DOI: 10.1016/j.ijpe.2007.11.001
- Files: joot_migration_from_edi_to_xml.pdf

Kütüphanenizi oluřturma

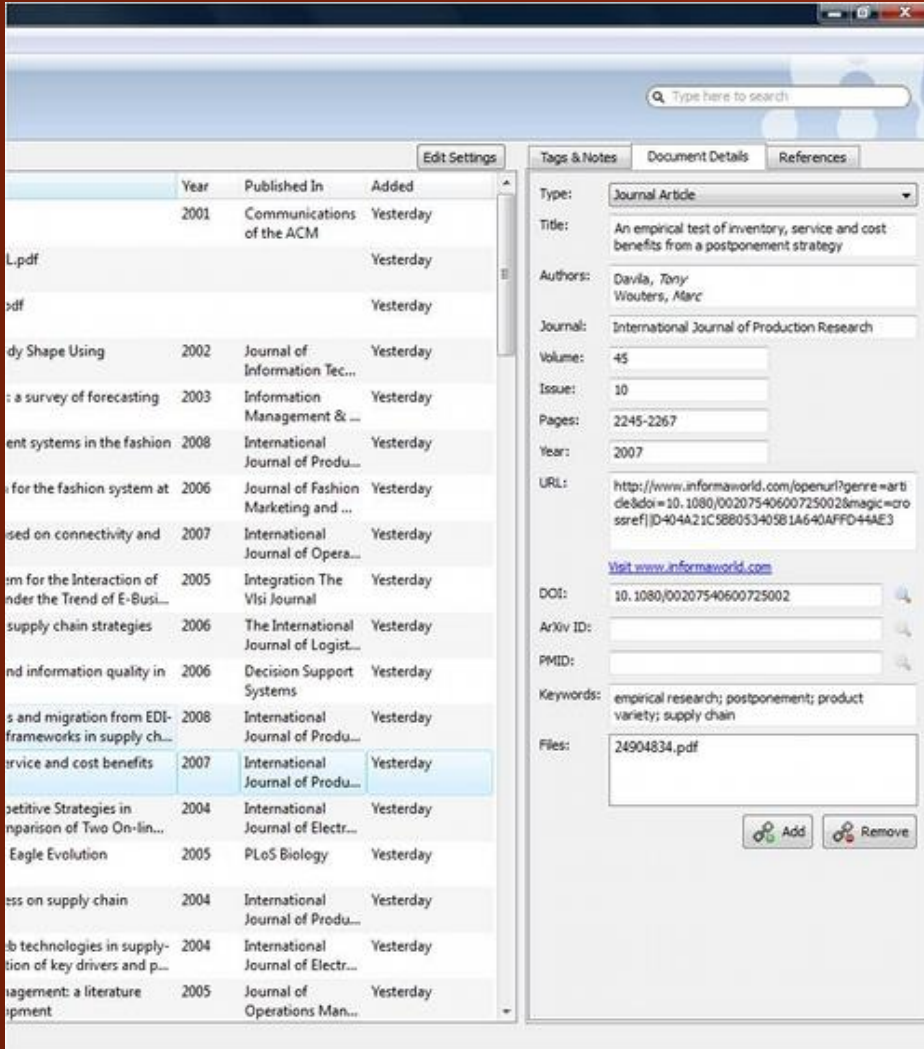

Kütüphanenizi oluşturmak için farklı seçenekleriniz var:

- Tek dosya veya klasörün tamamını ekleyin
- Bir klasörü takip ederek PDF dosyalarını otomatik içe aktarın
- Mevcut EndNote/BibTeX/RIS veritabanlarını ekleyin veya

...kütüphane paneline PDF dosyalarını sürükleyip bırakın

... ve Mendeley kendiliğinden belge detaylarını ayıklamaya çalışacak.

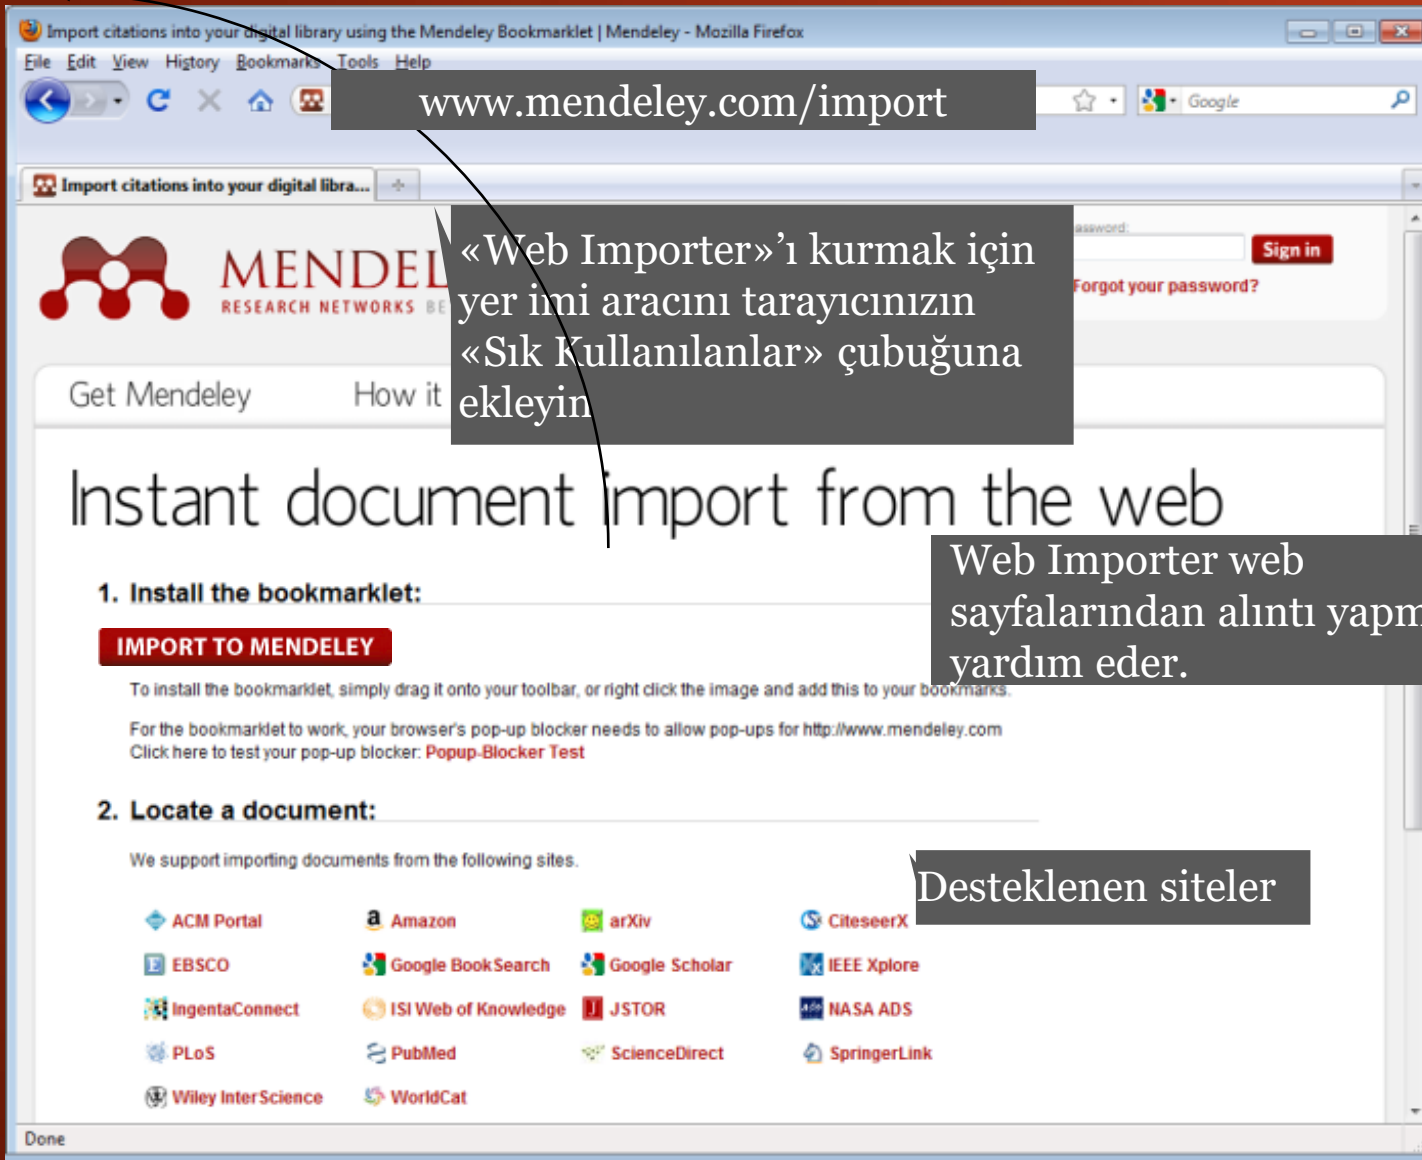

The screenshot shows the Mendeley Desktop interface. On the left, there is a list of documents with columns for Year, Published In, and Added. The selected document is 'An empirical test of inventory, service and cost benefits from a postponement strategy' by Davila, Tony and Wouters, Marc, published in the International Journal of Production Research in 2007. On the right, the 'Document Details' tab is active, showing the following information:

- Type: Journal Article
- Title: An empirical test of inventory, service and cost benefits from a postponement strategy
- Authors: Davila, Tony; Wouters, Marc
- Journal: International Journal of Production Research
- Volume: 45
- Issue: 10
- Pages: 2245-2267
- Year: 2007
- URL: <http://www.informaworld.com/openurl?genre=article&doi=10.1080/00207540600725002&magic=crossref|D=404A21C588053405B1A640AFFD44AE3>
- DOI: 10.1080/00207540600725002
- ArXiv ID:
- PMID:
- Keywords: empirical research; postponement; product variety; supply chain
- Files: 24904834.pdf

(Crossref, PubMed, ArXiv or Google Scholar) gibi çeşitli veritabanlarını sorgulayarak belge detaylarını tamamlamayı deneyebilirsiniz.

DOI, PubMed veya ArXiv ID bilgilerini girip büyüteç basarak da aratabilirsiniz

1 of 144 documents selected

The screenshot shows the Mendeley Desktop application window. The main area displays a PDF document page. The document title is "A taxonomy for selecting global supply chain strategies" by Martin Christopher, Helen Peck, and Denis Towill. The page number is 277. The document is from the journal "Global supply chain strategies".

The right-hand side of the window features a search bar with the text "strategy" entered. Below the search bar are three tabs: "Tags & Notes", "Document Details", and "References". The "Tags & Notes" tab is active, showing a search bar for "Abstract:", "Tags:", and "Notes:". The "Notes" section is currently empty.

The document content includes the following sections:

- Abstract:**

Purpose - The purpose of this paper is to address the increasingly important question of supply chain design for global operations. With the rise of off-shore sourcing and the simultaneous need for improved responsiveness to customer demand, the choice of supply chain **strategy** is critical.

Design/methodology/approach - The paper draws its conclusions from case-based research supported by survey data.

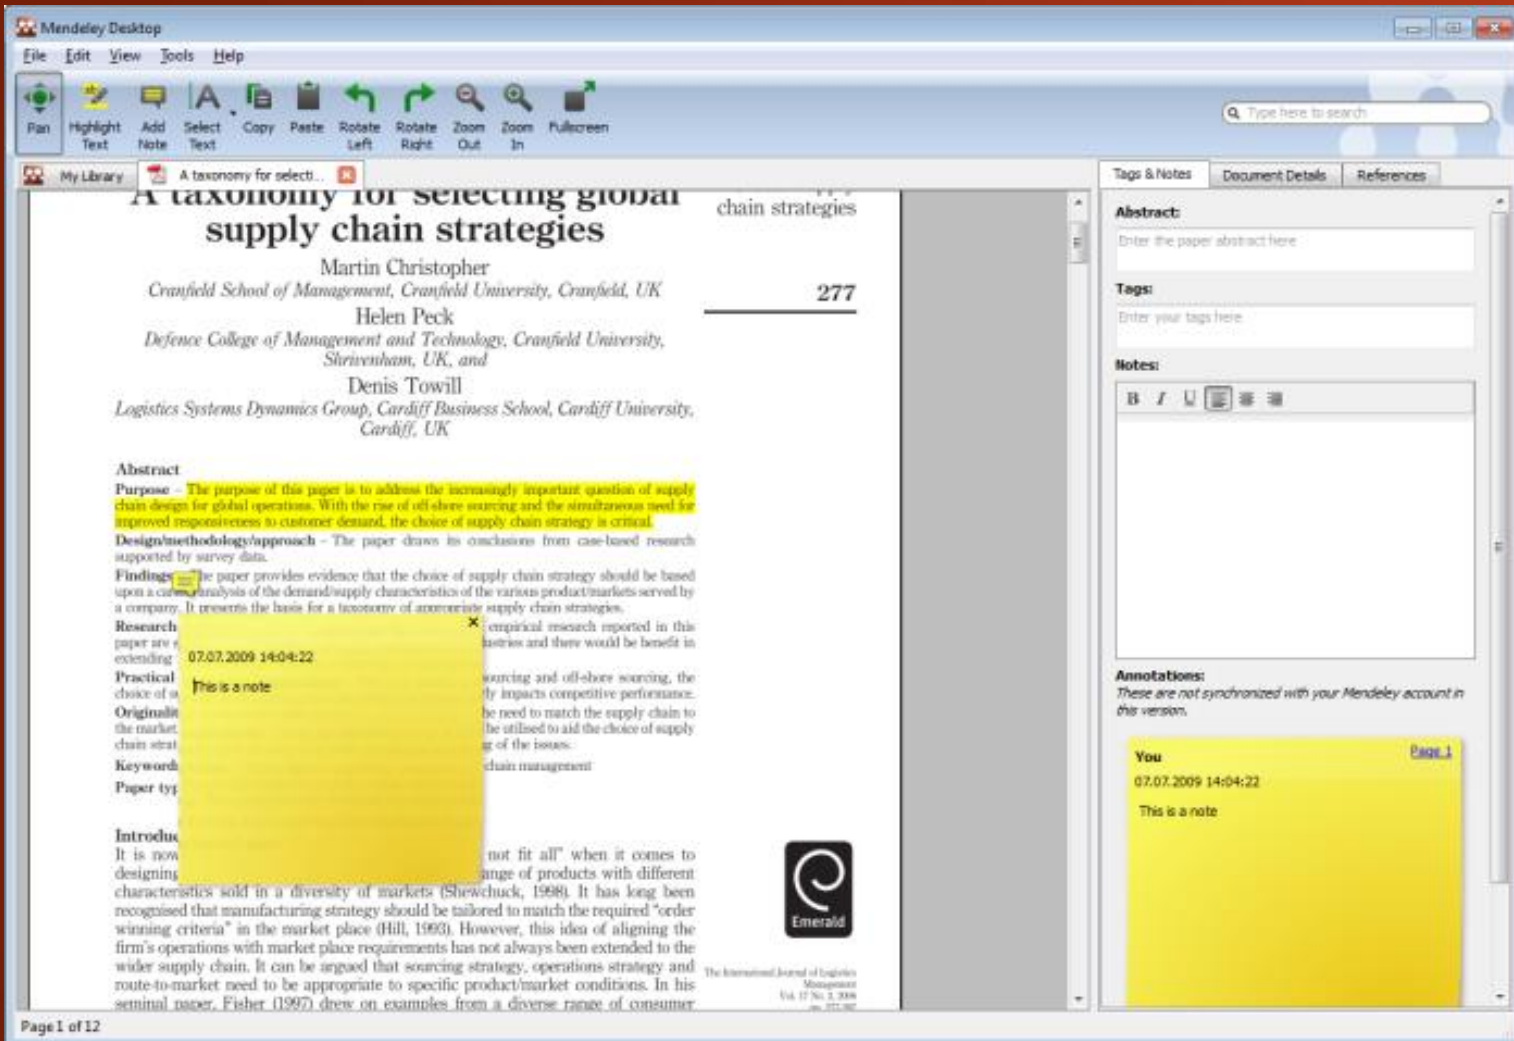

Findings - The paper provides evidence that the choice of supply chain **strategy** should be based upon a careful analysis of the demand/supply characteristics of the various product/markets served by a company. It presents the basis for a taxonomy of appropriate supply chain strategies.

Research limitations/implications - The case studies and empirical research reported in this paper are specific to the clothing manufacturing and fashion industries and there would be benefit in extending the research into other sectors.

Practical implications - Given the increasing trend to out-sourcing and off-shore sourcing, the choice of supply chain strategy is of some significance and clearly impacts competitive performance.

Originality/value - Whilst there is a growing recognition of the need to match the supply chain to the market, there is still limited research into what criteria should be utilised to aid the choice of supply chain strategy. This paper attempts to extend our understanding of the issues.
- Keywords** Sourcing, Lean production, Agile production, Supply chain management
- Paper type** Research paper

The bottom left corner of the window shows "Page 1 of 12".

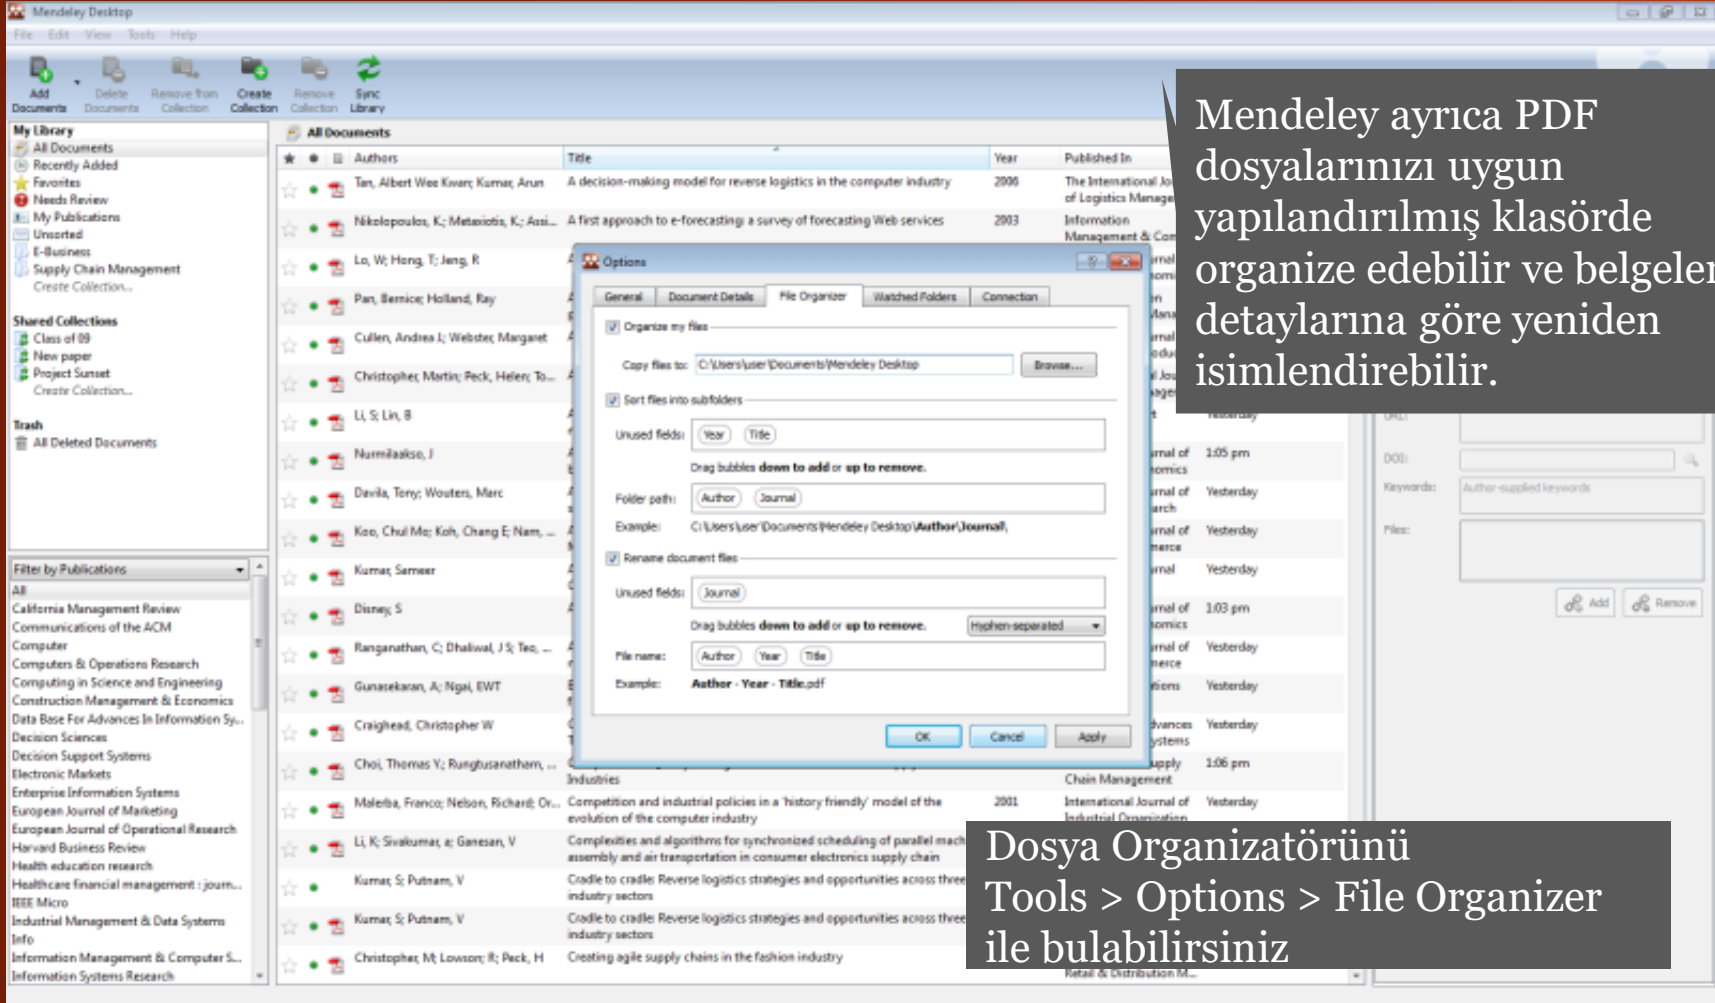

The screenshot shows the Mendeley Desktop application window. The main document is titled "A taxonomy for selecting global supply chain strategies" by Martin Christopher, Helen Peck, and Denis Towill. The document is from the Emerald journal, "The International Journal of Logistics Management", Vol. 17 No. 3, 2006, pp. 277-297. The page number 277 is visible in the top right corner of the document area.

Annotations are visible in the document and the right-hand pane. A yellow highlight covers the "Abstract" section, and a yellow note is attached to it. The note contains the text "This is a note" and is dated "07.07.2009 14:04:22". Another yellow note is visible in the "Annotations" pane on the right, also containing "This is a note" and dated "07.07.2009 14:04:22".

The right-hand pane includes sections for "Abstract:", "Tags:", "Notes:", and "Annotations:". The "Annotations" section shows a message: "These are not synchronized with your Mendeley account in this version." Below this, the annotation "You" is listed with the date "07.07.2009 14:04:22" and the text "This is a note".

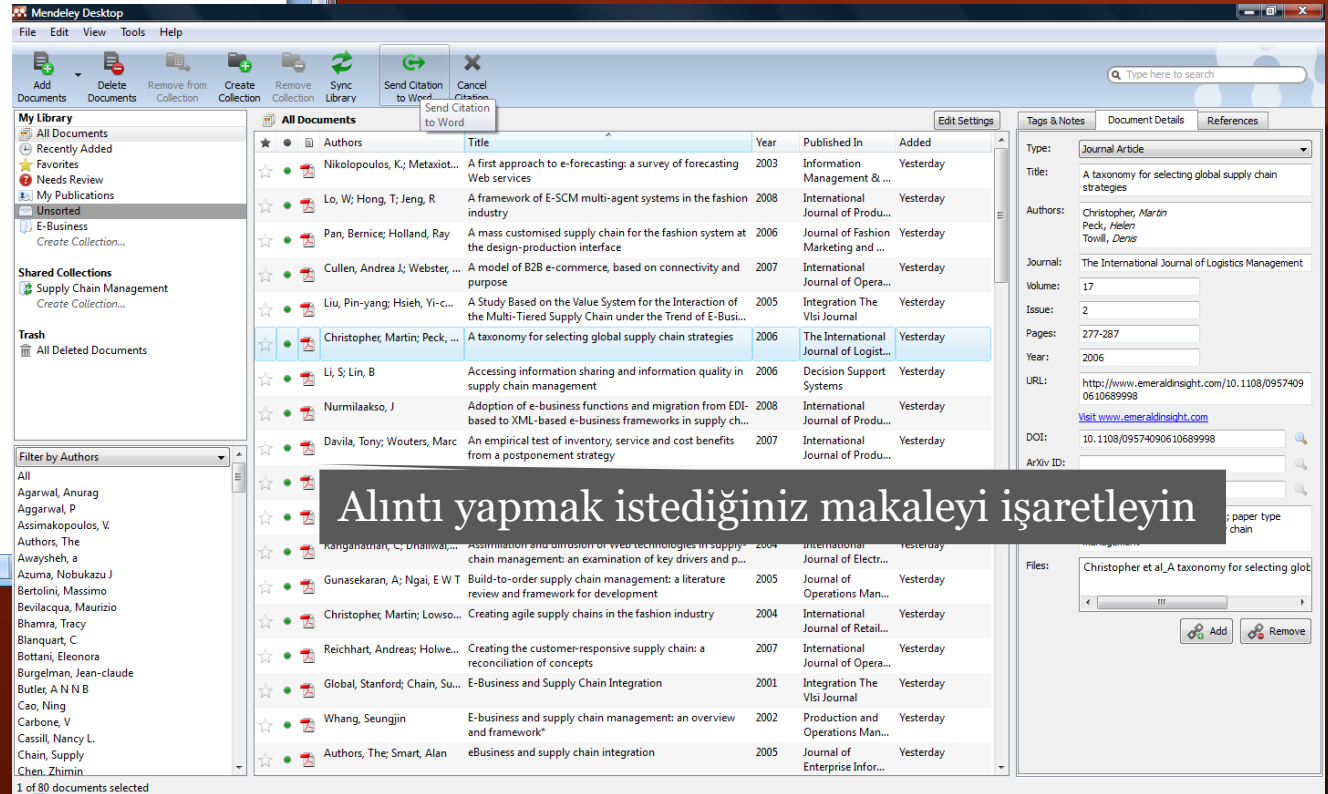

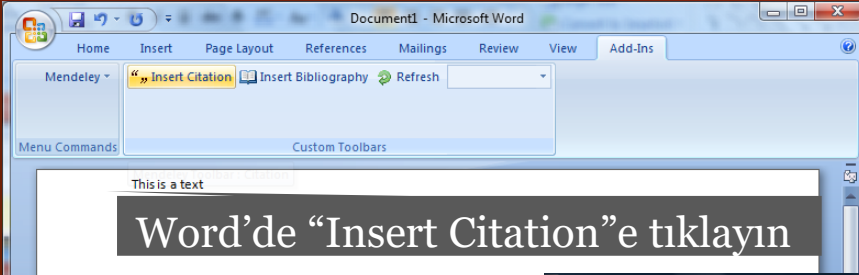

The bottom left corner of the window shows "Page 1 of 12".

Biographical Information

Jason Hoyt is the Research Director at Mendeley. He holds a PhD in Genetics from Stanford University where he was awarded the Ruth L. Kirschstein NIH predoctoral fellowship from 2002-2007.

Prior to joining Mendeley, he worked under Michele Calos studying translational research into human gene therapy. He developed new methods for non-viral gene delivery into mouse hematopoietic cells using the phiC31 integrase. Additionally, he used directed evolution to evolve phiC31, such that integration would occur at single location in the human genome, thus reducing potential side-effects. Also amongst his direct research advisors at Stanford were Gavin Sherlock, Anne Brunet, and Andrew Fire: 2006 Nobel Laureate in Medicine or Physiology.

While a graduate student at Stanford, Jason saw the need and opportunity to improve collaborative research through modern Internet technologies. This resulted in founding Ologeez.org (peer-review literature search, ...)

Abstract

Many scientists now manage the bulk of their bibliographic information electronically, thereby organizing their publications and citation material from digital libraries. However, a library has been described as "thought in cold storage," and unfortunately many digital libraries can be cold, impersonal, isolated, and inaccessible places. In this Review, we discuss the current chilly state of digital libraries for the computational biologist, including PubMed, IEEE Xplore, the ACM digital library, ISI Web of Knowledge, Scopus, Citeseer, arXiv, DBLP, and Google Scholar. We illustrate the current process of using these libraries with a typical workflow, and highlight problems with managing data and metadata using URIs. We then examine a range of new applications such as Zotero, Mendeley, Memento Papers, MNCBI, CiteULike, Connotea, and HubMed that exploit the Web to make these digital libraries more personal, sociable, integrated, and accessible places. We conclude with how these applications may begin to help achieve a digital defrost, and discuss some of the issues that will help or hinder this in terms of making libraries on the Web warmer places in the future, becoming resources that are considerably more useful to both humans and machines.
